Data Analyst | Python | ETL | SQL | AWS | Kafka | GraphQL |  
GraphDB  
Malta

## Summary

3+ years of work experience with data analysis and analytics engineering:

- Work experience with data analysis, data cleaning, and transformation using Python (pandas), SQL, and Power BI;
- Work experience building analytical data models (star/dimensional) for reporting and KPI tracking;
- Work experience in ETL/ELT processes, integrating data from Excel, Access, SAP, PostgreSQL, and APIs;
- Work experience in data visualization and dashboarding (Power BI), delivering business-oriented insights for logistics and engineering teams;
- Work experience improving data quality, validation, and standardization, reducing manual reporting efforts by up to 30%;
- Work experience collaborating with business stakeholders to translate requirements into actionable metrics and reports;
- Solid knowledge in programming (Python and SQL), with experience querying and modeling data in Graph Databases (GraphDB / Gremlin).

I am curious, adaptable, and easygoing, always open to new challenges. I enjoy participating in hackathons and data-driven projects, continuously improving my technical and business skills.

---

## Experience

Tecnocomp Tecnologia e Serviços  
Data Analyst | BI Consultant  
June 2025 - Present (8 months)  
São Paulo, Brazil

Maintained and improved Power BI models (DAX, Power Query) for engineering KPIs, raising data reliability and adoption.

Automated data prep with Python (pandas/NumPy), reducing manual effort and refresh issues in recurring reports.

Standardized Excel/Access/MS Project data flows, improving consistency across stakeholder deliverables.

## Transportes Furlong S.A.

2 years 3 months

### Logistics Data Analyst

February 2024 - June 2025 (1 year 5 months)

São Paulo, Brasil

- Developed interactive Power BI dashboards to monitor operational productivity and logistics efficiency.
- Created SQL queries to extract, transform, and analyze large datasets, providing strategic insights for route optimization and cost reduction.
- Automated reports using Python (Pandas, NumPy), reducing the time spent on logistics KPI analysis by 30%.
- Analyzed transportation patterns and inventory movement, identifying bottlenecks and opportunities for operational improvements.
- Collaborated with cross-functional teams to implement data-driven enhancements, directly impacting supply chain performance.

### Import and Export Assistant

April 2023 - February 2024 (11 months)

São Paulo, Brasil

## Fiorde Logística Internacional

### Data Assistant

November 2021 - January 2023 (1 year 3 months)

São Bernardo do Campo, São Paulo, Brasil

- Used SAP to optimize inventory control, improving accuracy and efficiency in reporting processes.
- Developed and maintained automated Google Sheets, using macros and advanced functions to enhance dispatch planning.
- Assisted in the analysis of logistics costs and resource allocation, ensuring alignment of inventory with production needs.
- Extracted, organized, and interpreted operational data to identify patterns and suggest process improvements.
- Collaborated with various departments to ensure data integrity and optimize the flow of information across teams.

---

## Education

### UNINOVE

Bacharelado, Modelagem de Dados/Armazenagem e Administração de Base de Dados · (January 2025 - January 2027)

### EBAC - Escola Britânica de Artes Criativas e Tecnologia

Associate's degree, Processamento de Dados e Tecnologia de Processamento de Dados · (July 2023 - June 2024)

### UNINOVE

Bacharelado, Engenharia · (February 2022 - December 2027)

### Senac São Paulo

Gestão da Cadeia de Suprimentos e Logística · (January 2020 - June 2022)
